

# MACTAC®

- Exclusive LOW-HEIGHT design.
- Airtight Auto-locking Lid.
- 5% more water storage capacity (complying IS specification).
- Easy to Install.

The Black layer of MACTAC TANK is manufactured from Carbon black compounded polyethylene granules conforming to the requirements of IS Specification.

MANHOLE LID: As per IS Specification MACTAC tank is covered with manhole lid for Double Locking system which fits securely over the top of the rim of the tank in order to prevent the ingress of foreign matters such as insects, mosquitoes or dust. Its automatic locking system provides security against the loss of lid due to strong winds.

MACTAC TANK meets all the requirements of IS Specification in case of use of the raw material, dimensions and manufacturing process.
